

OUR INTEGRATION POLICY:

İZMIR SHIP RECYCLING intends to establish a management system in order to implement requirements of 9001:2008 QUALITY MANAGEMENT SYSTEM, ISO 14001:2004 ENVIRONMENTAL MANAGEMENT SYSTEM and OHSAS 18001:2007 OCCUPATIONAL HEALTH AND SAFETY MANAGEMENT SYSTEM unified management systems on its administrative and operational activities.

We, as administration, undertake to implement our ship dismantling activities by following national and international protection systems, techniques and the guides published, and to comply with all the national Laws and regulations and the International agreements concluded by Turkey and to implement them accordingly in order that health and safety of the environment and the employees will not be endangered.

In order to reach our goals

- * To enable prevention of contamination and accidents in our activities,
 - * To sustain an Environmental and Occupational Health and Safety and Quality Management System that is supported by the Senior Management and adopted and implemented by all employees, audited, revised and observed by the public and that is continuously improved.
 - * To inform the relative institutions, visitors, personnel and suppliers of the measures, safety precautions taken, our commitments, implementations with respect of the Environmental Protection, Occupational Health and Safety and the quality management system.
 - * To subject our system to the audit or to make them audited in order to assess and monitor the performance of our policy in attainment of our goals, and to prevent work and occupational accidents.
- To raise the consciousness of our personnel at each position towards protection of Environment, their health and safety.
- * To make contribution to the energy saving and reduction of the natural resources usage,
 - * To increase our efficiency by working with our sub-contractors in mutual collaboration and trust.
